* The number of individual *Connections* made from this IP address to the streaming system during this event. This could be the same device reconnecting (e.g. the live stream page was refreshed), multiple devices connected at once, or any combination thereof. Each time a *connection* is made, this value is incremented. The *Duration* represents the **cumulative time** of all connections from this IP address.

Making it Easy for your Staff or Volunteers

- Fully Automated Options
- One Button Streaming Options
- Scheduling
- You have complete control
