

Flip4Mac WMV 2.3.2.6 Release Notes

Flip4Mac WMV is a collection of QuickTime™ components that allow you to play, import and export Windows Media® files. Flip4Mac WMV can be used with most QuickTime applications including QuickTime Player, and Final Cut Pro.

System Requirements

Flip4Mac WMV components are compatible with Intel and PowerPC (G4+) Mac OS X versions 10.4 or later (including Snow Leopard); QuickTime 7.0 & QuickTime X (7.1.6 or higher recommended).

Upgrade

After installing Flip4Mac WMV you can play Windows Media files in QuickTime Player and view Windows Media content on the Internet using Safari and other web browsers.

By upgrading Flip4Mac WMV you will be able to import Windows Media files for editing or create Windows Media files for distribution. These features are available in trial mode until you're ready to purchase an upgrade.

You can purchase an upgrade at the Telestream Store or directly from the software by selecting Flip4Mac WMV in the System Preferences application.

Web Browser Support

Flip4Mac WMV includes an Internet plug-in that plays Windows Media streams within Safari and other web browsers.

While the Flip4Mac WMV plug-in provides superior playback performance, it is unable to play content that has been protected using Windows Digital Rights Management (DRM).

Changes in this Release

- None

Fixes in this Release

- Fixed problems playing back files and streams with MP3 content.
- Corrected problems launching QuickTime Player under Snow Leopard.
- Fixed possible deadlock while purchasing a license.
