Wirecast 3.0.6 Release Notes

About Wirecast Release Version 3.0.6

Wirecast updates can be downloaded from http://www.flip4mac.com/wirecast_download.htm

New in Wirecast 3.0.6

- Branding for Telestream, including new documentation images
- New installer for Windows
- eSellerate in-app purchase and eSellerate serial numbers
(NOTE: old serial number are still accepted by Wirecast)
- Change default directory when saving documents to be the Documents directory

Fixed issues in Wirecast 3.0.6

- Fixed bug where using Filters for titles were not working
A filter is where you can show, for example, only those titles with 3 lines of text, etc.
- Fixed bug on Windows platform where some devices with non-ascii names were being saved to the XML file without converting the name properly to UTF8. The result is that the documents could not be opened by Wirecast.

New in Desktop Presenter 1.0.3

- Branding for Telestream, including new documentation images
- New installer for Windows
