# Episode 6.4 Now Available

Telestream is pleased to announce the release of **Episode 6.4** software. This free update expands Episode's powerful encoding capabilities and makes it easier than ever to integrate Episode into your workflow.

Highlights include:

- Optimized for even higher volume workflows
- Support for .SCC and H.264 web captions
- Easy-to-use API documentation with examples
- Video rotate filter adding more filters to your toolbox
- Sub folder deployment enabling automated mirroring of complex folder structures

Please read the **Episode 6.4 Release Notes** document for complete details.
