

Play – Edit – Make Windows Media on Your Mac

Flip4Mac® WMV QuickTime plug-in components allow you to import, export, and play Windows Media video and audio files on your Mac. Flip4Mac WMV can be used with most QuickTime-based applications, including QuickTime Player, Final CutPro, and more.

When you install Flip4Mac WMV you can play Windows Media files using QuickTime Player and view Windows Media content on the Internet using your web browser. By upgrading Flip4Mac WMV you can import Windows Media files and create Windows Media files for distribution. These features are optional and available in trial mode until you need them.

Play Windows Media in QuickTime Player – it's free
Flip4Mac WMV Player component allows you to play Windows Media in QuickTime Player and your web browser. In fact, you can play Windows media in almost any application that supports QuickTime. With Flip4Mac, you don't have to pass up high-definition movies or Windows Media files you find on the Web. You have more viewing options and the great playback experience you've come to rely on with QuickTime Player

Import and Export Windows Media on Your Mac
Upgrade to add Import and Export: You can import and export Windows Media content using applications like Final Cut Pro, Final Cut Express HD and QuickTime Pro by purchasing one of these upgrades:

Flip4Mac WMV Player Pro

- Adds the ability to import Windows Media files for editing or conversion to other formats

Flip4Mac WMV Studio

- Adds the ability to export Windows Media files using preset encoding templates – great for those new to encoding

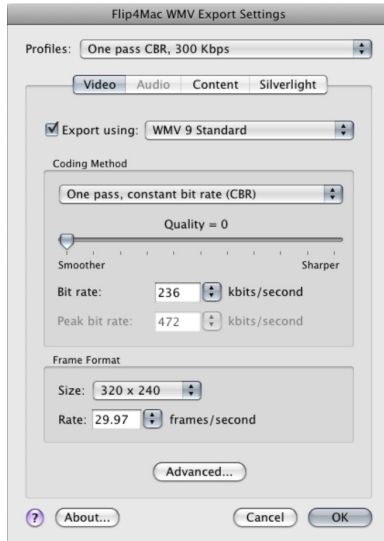

Flip4Mac WMV Studior Pro

- Adds the ability to create your own standard definition, one-pass encoding profiles – for those who want more flexibility

Flip4Mac WMV Studio Pro HD

- Adds the ability to create high definition and two-pass encoding profiles – for ultimate quality and flexibility
