

## Release Notes

### Wirecast Plugin for Elgato Stream Deck 1.4

#### Requirements

1. An Elgato Stream Deck control panel plugged into your computer via USB.
2. Stream Deck software (for Windows or Mac) located at: <https://www.elgato.com/en/gaming/downloads>.
3. Wirecast software
4. Minimum OS versions: Windows 10, macOS 10.12

#### Installation

1. Connect your Stream Deck controller via USB on your computer.
2. Download the Stream Deck software at: <https://www.elgato.com/en/gaming/downloads>.
3. Open the Stream Deck software application and click the Stream Deck Store icon above the button panel next to the Preferences icon.
4. Select *Plugins > Video*, then locate the Wirecast Stream Deck plugin on the list and click *Install*

#### Release Notes version 1.4

- **Fixes:**
  - WIRE-19106: Fixed an issue where quitting Wirecast with Stream Deck software running could cause a CPU spike and slow memory leak.
  - WIRE-19149: Fixed an issue that caused the Stream Deck Plugin to be slow to establish a connection with Wirecast

#### Release Notes version 1.3

- **Fixes:**
  - WIRE-18684: (macOS) Using comma(s) in shot's name no longer disrupts Stream Deck connection to Wirecast.

#### Release Notes version 1.2

- **Fixes:**
  - WIRE-18330: Fixed an issue where the MultiShot by name feature was not working on Windows.
