*Telestream has helped religious organizations of all sizes to:*

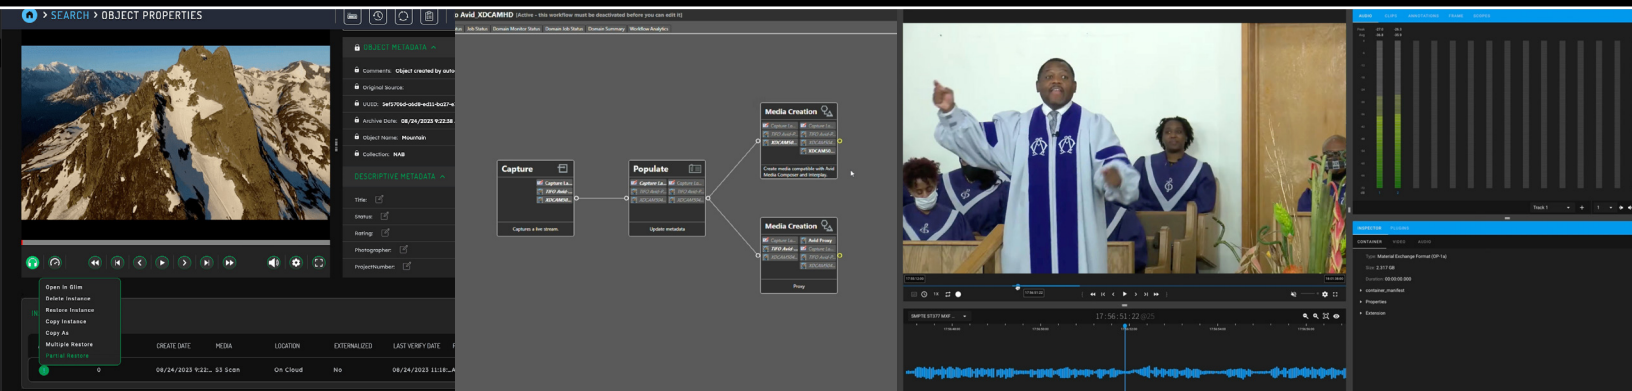

### Capture & Ingest High-Quality Media with Confidence

Broadcasting high-quality worship content online starts with capturing media and immediately preparing it for downstream processing or delivery. Telestream offers robust SDI/IP/hybrid and web-based solutions for:

- Multi-channel, multi-format live media capture & ingest
- Ultra-high-definition media inspection & synchronization
- IP media network & contribution feed monitoring
- Powerful media transcoding & conformance workflows
- Effortless remote feeds & video conferencing

## Enhance & Personalize Worship Streaming Content Effortlessly

Optimize your content for your intended audience, whether it's overlaying graphics, generating closed captions, or creating quick clips for social media. Telestream provides easy-to-use, remote-accessible solutions for:

- Flexible live video production & audience engagement
- Intelligent media processing & workflow automation
- High-quality media clipping & archival workflows
- Comprehensive waveform monitoring & visual correction

## Deliver Captivating & Powerful Online Experiences Worldwide

Reach diverse and widespread audiences everywhere with flexible tools that ensure high-quality content experiences across all platforms. Telestream empowers confident content delivery through:

- Intuitive hybrid event & video hosting software
- Cloud-native, automated quality control & encoding solutions
- End-to-end media delivery & monetization tools

*Worship Leaders Trust Telestream to Share Their Faith-Based Content*
