

CardAgent for Vantage

Product Sheet

CardAgent for Vantage

CardAgent helps with:

Clip preparation

Identify cards, select clips and prepare them for ingest – using a simple interface for non-technical staff.

Media manipulation

Pick individual clips, play them back, trim and rename clips, and add custom metadata.

Driving production

Simple and intuitive user interface runs on a basic PC so non-technical staff can drive production.

CardAgent is an intuitive job submission tool to allow staff to interact and prepare media files for processing by a Vantage workflow. CardAgent automatically identifies camera cards (including single clips) and allows the operator to play back clips, trim clips, rename clips and add custom metadata prior to submitting to a Vantage workflow.

The CardAgent software runs on a Windows 10 PC with an Intel I7 Processor, and 8 GB of RAM.

CardAgent connects to a Vantage system across a LAN network.

CardAgent is sold as a single license per PC.

Key Features

- Browse, view & playback camera card and single file structures via CardAgent's built-in player
- Rename clips
- Trim clips
- Select certain clips to be processed rather than an entire camera card
- Create custom playlists for stitching
- Add custom metadata via labels/variables set in a Vantage workflow
- Send media to a Vantage workflow for processing
- Provide feedback on workflow status once media files have been submitted to a Vantage workflow
- Back up camera cards. Enable MD5 checksums for copy validation
