

Live Schedule Pro

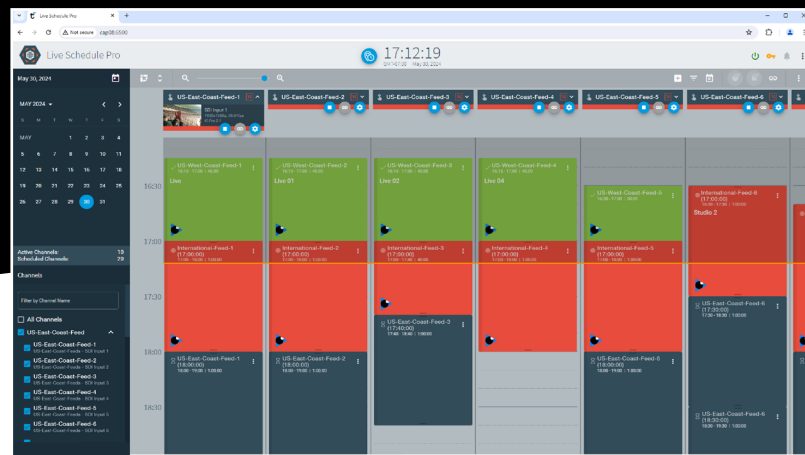

Always-On Scheduling
and Orchestration for
Live Capture

Innovative Tools for Easy and Efficient Scheduling

Live Schedule Pro is a powerful automated scheduling solution that provides a centralized single pane of glass monitoring of ingest channels and event creation. With its unique Intelligent Channel Management, Live Schedule Pro helps keep programming uninterrupted, providing automated retries if disruptions occur while integrated router control removes the need for third-party systems. It streamlines programming workflows with drag-and-drop multi-event cutting, copying, and pasting—allowing schedules to be planned ahead of time. In addition, with continuous recording capabilities, it's easy to access any previously recorded clip, ensuring flexibility and reliability 24/7/365.

Advantages of Live Schedule Pro

- Offers live video and audio channel preview
- Schedule events on multiple standalone servers or multiple-server capture domains
- Supports single and recurring events
- Provides segmented recording option for streamlined event scheduling
 - Allows users to segment long events into manageable chunks with frame-accurate, back-to-back recording.
 - Allows for always-on recording utilizing Live Capture's built instorage management capabilities ensuring no recordings fail due to lack of storage.

- Gives operators the ability to go back in time to visually review items of interest via Telestream GLIM
- Incorporates Intelligent Channel Management (ICM)
 - Helps users managing large numbers of Capture record channels by automatically finding and scheduling events on free channels
 - Automatically routes the appropriate video source via Telestream router control option (required).
- Provides Crash Record and Gang Record
- Includes automatic retry functionality
- Configurable web-based user interface
 - Channel grouping support
 - Horizontal and vertical modes
- Dynamically lengthen or shorten actively-recording events
- Supports metadata input for downstream workflows
 - Update metadata during events including Avid Media Central metadata
- Provides powerful REST API support
- Integrates with Telestream GLIM for open file review and approval as well as live sub-clipping.
- Provides Avid Media Central integration via Vantage
 - Powering live edit workflows for growing files
- Features extensive SDI & IP router control support via Live Schedule Pro router control options.

Router Control Protocols

Brand	Model	Protocol
AJA	Kumo	CVG Native
Barnfind	BarnOne	Pro-bel SW-P-08
Blackmagic	VideoHub	BMD Videohub
Evertz/Quartz	Magum	Quartz RCP 1
	EQT	
	EQX	
FOR-A	MFR-4100 series	Leitch Pass-through, with extensions
Grass Valley	Orbit	Pro-bel SW-P-08, NVision NV 9000
Grass Valley	Jupiter VM-300	Jupiter ASCII
Grass Valley	SMS7000	CVG Native
GVG/NVision	NV9000	NVision NV 9000
GVG/NVision	NV5128, etc	NVision router
GVG/NVision	CR Series	NVision router (UDP)
GVG/Snell	Aurora	Pro-bel SW-P-08
	Orbit	
	Sirius	
Imagine/Harris/ Leitch	Platinum	Leitch Pass-through
	Panacea	
	Magellan	
Imagine/Harris	Platinum	Harris LRC
	Magellan	
Kramer	Misc	Kramer-2000
Kramer	Misc	Kramer-3000
Lawo	VSM	Pro-bel SW-P-08
Nevion	VikinX Sublime	Nevion MRP
Nevion	VideolPath	Nevion MRP
Nevion/Network	Network	Network NCB
PESA		PIN
Pro-Bel		Pro-bel SW-P-02
Pro-Bel	Halo	Pro-bel SW-P-08
	Freeway	
Rascular	RouteMaster	Rascular WebSocket
Ross	Ultrix	CVG Native, Pro-bel SW-P-08
Sierra Video	Aspen	Aspen
UTAH	SC-4, SC-40, SC-400	RCP-3A
