

Live Schedule

Unified Schedule Application for Lightspeed Live Capture

Overview

Lightspeed Live Capture's Live Schedule option is a unified scheduling application that automates the recording of channels on a single stand-alone Live Capture server or with any channel within multiple Live Capture servers joined into a multi-capture server domain. The Live Schedule UI is completely web-based and can be opened from any modern browser running on any operating system. Channel capture events can be configured to simultaneously capture high-resolution media and low-resolution proxies, acquire metadata—and make use of all the powerful tools available with your Live Capture/Vantage systems.

System Features

- Unified scheduling application
- Schedule events on a standalone server or multiple server capture domain
- Control all channels in your Live Capture system
- As few as 2 or as many as 102 (or more)
- Easy to use Web-based UI design
- Unlimited users supported
- Dynamically lengthen or shorten actively recording events
- Unified channel status view
- Combine workflows into individual channel groups
- Allows for instant event recording
- Powerful REST API is available
