

Announcement for Product Retirement and End of Support for FlashNet

This notice serves as formal communication of Telestream's intent to end sales of FlashNet expansion licenses on **December 31, 2022**, and to discontinue support of FlashNet on **March 31, 2025**.

The FlashNet content management system became part of the Telestream portfolio through the Masstech acquisition in March 2021. FlashNet was originally developed by Software Generation Limited (SGL).

FlashNet customers can [upgrade to Telestream's DIVA or Kumulate solutions](#), while keeping their yearly payments at the same price as their existing support fees. The upgrade is designed to use the FlashNet-written archives on their existing media, so that customers can avoid a time-consuming media migration while moving to a solution with a modern architecture and an expanded feature set.

Support questions can be directed to support@telestream.net.

Sales questions can be directed to enterprisesales@telestream.net.
