

AP Dope Sheet Fix

AP has changed the formatting of their Dope Sheet by adding the following name space to the “nitf” Element:

xmlns="<http://iptc.org/std/NITF/2006-10-18/>"

The Vantage Workflow will complete, but the Dope Sheet information from the “apply-templates” Element that is populated in the Avid Interplay “Frame Locator” field will no longer be present and will be empty.

Pre 6/14/2023 AP XML Source:

```

1 <?xml version="1.0" encoding="utf-8"?>
2 <nitf version="//IPTC//DTD:NITF:3.4//EN" change.date="October:18,:2006" change.time="19:30">
3   <head>

```

The Stylesheet used by the Transform Action in the Vantage AP Workflow will need to be modified or replaced so that the Vantage Workflow can Extract the data from the “apply-templates” Element.

In the screenshot below, the outlines indicate the changes that need to be made in the Style Sheet:

The following is the text of the above XSL:

```
<?xml version="1.0" encoding="UTF-8"?>
<xsl:stylesheet xmlns:x="http://iptc.org/std/NITF/2006-10-18/" version="1.0"
