

Wirecast and NDI™

NDI™ is a standard that enables video-compatible products to communicate, deliver, and receive high-definition video over a computer network. In Wirecast you can bring in NDI-compatible sources, control NDI-capable PTZ cameras, and send a Program Feed out via NDI for use in other NDI-compatible hardware or software.

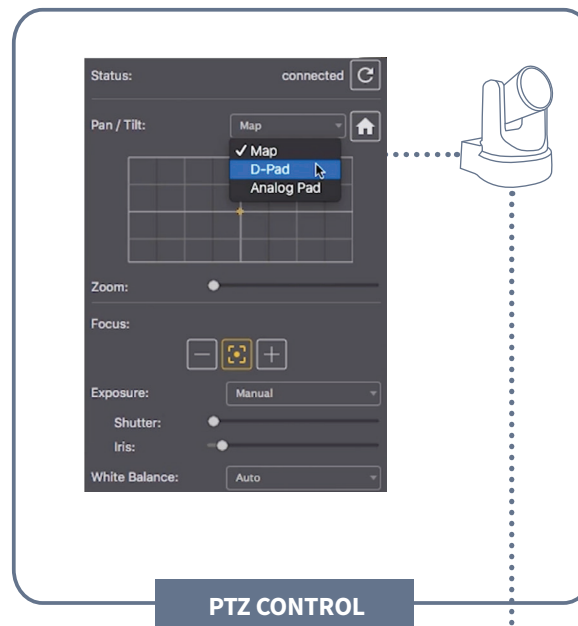

Bring in NDI sources

Easily add NDI sources into Wirecast

Control PTZ Cameras over NDI

Control your NDI-capable robotic cameras via the Wirecast built-in PTZ Controller

Send Program Out via NDI

Share your Wirecast Program Output over your local network as an NDI source
